## President's Report

By Orlean Koehle

If you have been following the Phyllis Schlafly report over the past two years, Jerome Corsi's articles in Human Events and other conservative websites, magazines, books, and Lou Dobbs reports on CNN news, then you know of the threat that now exists to our American sovereignty with a movement to transform the United States, Canada, and Mexico into one big North American Union with a common currency to be called "Amero."

The executive branches of all three countries, without any congressional or parliament oversight, and with very little (if any) media coverage, have formed binding ties with 20 working groups from each country "harmonizing" the laws of all three nations.

What has been officially formed is called the Security and Prosperity Partnership (SPP), entered into by President Bush, and the Prime Ministers of both Mexico and Canada, March 23, 2005, in Waco, Texas. What are the ultimate goals of this partnership and when do its proponents hope to have them achieved? How does the NAFTA Superhighway, to be built from Mexico through the United States to Winnipeg, Canada, enter into this plan?

## Eagle Forum Education Conference

To get the answers to the above questions and more, we invite you to attend our Sixth Annual Education Conference, March 31, (9:00 A.M.-9:00 P.M.) at the Double Tree Hotel in Rohnert Park, (near Santa Rosa) in Northern California.

"**Danger, Sell Out Ahead**" was chosen as the theme because of the various "sellouts" that are now going on in our nation. You will hear the following outstanding speakers expound on those "sellouts:"

**Phyllis Schlafly**, national Eagle Forum President and founder will be speaking in the morning about her book, *The Supremacists*, "**The Sellout of our Judiciary.**" In the evening, she will speak on her two years of research on "**The Sellout of U.S. Sovereignty Through The Clandestine Movement to form a North American Union.**"

**State Senator Tom McClintock**, one of California's finest conservative statesmen who has served as a state legislator for 22 years will be the luncheon speaker and will talk about "**The Sellout of Our Property Rights - Eminent Domain Run Amuck.**"

**Dan and Margaret Byfield of Texas**; Margaret is the director of Stewards of the Range, a national property rights organization. Dan's ranch in Texas is just one mile from where the first branch of the NAFTA Superhighway is being built. Their talk is called "**Highway Robbery: Lessons Learned Fighting the Trans-Texas Corridor.**"

**Barbara Simpson - KSFO Talk Radio Host** will serve as the MC for the evening banquet and speak on the subject of how the movement to form a North American Union has gotten this far "flying under the radar" without the vast majority of Americans even knowing about it. Her talk is entitled "**The Sellout of America, Through Media Silence.**"

**Sharon Hughes - Host of Changing World Views on KDIA Christian Radio** will serve as the M.C. for the day's program and will speak on the movement she has been researching - how liberals are infiltrating and influencing churches. "**The Danger of the Emergence of the Religious Political Left.**"

(Continued from page 1)

## Other Outstanding Speakers and Their Topics

**Susan O'Donnell** - education researcher and editor of the National Education Monitor. She will discuss the sellout of traditional American education with high standards and moral instruction that was to be left under local and parental control and now is under federal and United Nations control. Her talk is called **"Education Transformation in America - From Local Control to UNESCO"**

**Orlean Koehle** - State President of Eagle Forum of California, author, school teacher. Her talk will tell of the experience she had having to teach a unit on Islam in a 7<sup>th</sup> grade World History course. She will tell of the blatant indoctrination she read in the textbook where Islam is highly praised and Christianity is downgraded. **"Islam In - Christianity Out - The Pro-Islam Indoctrination in California Schools and Text Books."**

**Maria Donnelley** - Vice President of Sonoma County Land Rights Coalition. She will tell of the current battle rural residents of Sonoma County are having with a General Plan that is being proposed to regulate private property: 100 feet on either side of creeks, streams, and 200 feet for rivers; the monitoring and metering of private wells; and new zoning such as "biotic habitat," which essentially means your land now has endangered species on it and you can no longer use it for anything, **"All for the Common Good - The Regulatory Takings of Rural Lands and Property Rights."**

**Randy Thomason** - President of Campaign for Children and Families Randy has been one of the leaders in standing up for traditional marriage and fighting the gay rights activists and their agendas. **"The Attack on Marriage and Morality in Our State and Nation."**

**Pastor David Miller** - A courageous pastor who left the Episcopal church because of their policy of accepting gay clergy. **"The Attack on Marriage and Morality in our Churches."**

**Dr. Steven Crane** - A Christian medical doctor who takes a stand against abortion. "The Sanctity of Life, the Link Between Abortion and Euthanasia."

**Holly Swanson** - author of Set Up and Sold Out, "Turning our Children Green from Kindergarten through College."

**Jonathan Ashbach** - a 16-year old home-schooled conservative who has had 8 articles published in his local newspaper which has reaked havoc from the liberals. (Read following article on Global Warming, He will be speaking on **"Standing for Conservative Values in a Sea of Liberals."**)

**Special Awards:** At our annual conference, we always choose outstanding people whom we would like to honor. This year we will be honoring the following:

**Pastor and Mrs. David Miller and Family** as "Pastor and Family of the Year Award" for David's courage to stand by his convictions and his wife and family supporting him.

**Barbara Simpson** - "Excellence in Media Broadcasting Award" - for her many years as a talk show host and her courage to tell the truth about many controversial issues including the North American Union.

**Senator Tom McClintock** - "Statesman of the Year Award, for his 22 years of standing on principle and convictions in his elected positions in the state legislature.

**Sharon Kientz** - Eagle Forum Leader of the Year Award - for her successful stand against Teen Screen and leading the battle in defeating it in the Fresno Schools.

**John Ashbach** - Student of the Year Award - for the courage to stand up for and write about his conservative values.

**Please Join Us and Stop the Sellout:** As you see, our education conference is going to be full of outstanding speakers and valuable information that can give us the knowledge that we need to take a stand and try to stop the sellout of our judiciary, the Judeo-Christian moral principles upon which our nation was founded, our basic human rights of life, liberty, and property; a decent education under local control for our children without global, green, and Islam indoctrination, and lastly our American sovereignty

If you have not already received a brochure about it, please go to our website and download a copy with a registration form: (Go to [www.eagleforumofcalifornia.com](http://www.eagleforumofcalifornia.com).)

**Knowledge is power! Please join us so you too can be better informed and can take that knowledge and help stop the sell-out!**

## Earth's warming due to natural causes

From *The Eureka Reporter*

by Jonathan Ashbach, Fortuna, 12/8/2006

Your reaction to Al Gore's movie about global warming, "An Inconvenient Truth," will most likely depend on how you prepare to see it. If you watch it ready to buy everything it claims, you will likely consider it one of the scariest horror movies ever made — because it is purportedly true. However, if you do some research first, you are likely to find it a fairly well done, moderately entertaining spoof.

One of the film's more blatant lies is Gore's pretension that there is scientific consensus regarding global warming. His evidence is a survey of 928 articles in scientific magazines, all of which supposedly affirmed it. Dr. Benny Peiser of Liverpool John Moores University reviewed the same articles and found that only one-third actually did so. In fact, a survey of 530 scientists in 27 countries found them very divided. On a scale of 1 to 7, the scientists were asked to show how much they agreed/

(Continued on page 3)

(Continued from page 2)

disagreed that humans were causing global warming. The average answer was 3.62, almost exactly down the middle.

Science, though, is not run by majority rule, but evidence, which gives no cause for alarm. First, the whole basis of Gore's theory is that human carbon dioxide emissions are increasing atmospheric green house gases, thus raising global temperature.

This, he claims, leads to numerous problems, from the Arctic and Antarctic ice sheets melting and raising sea level by 20 feet, to the earth getting too hot.

However, it is not even known how much an increase in CO2 levels would affect the earth's temperature. Gore's chart showing correspondence between the two looks convincing until you discover that rising temperatures generally precede rising amounts of CO2, not vice versa. In fact, according to researchers at the Oregon Institute of Science and Medicine, changes in the earth's temperature are more closely related to solar activity than greenhouse gases. A particularly condemning piece of evidence is that from 1980 to 1996, as carbon dioxide levels continued to rise, the temperature actually cooled slightly. In addition, with levels still rising, the Antarctic ice sheet is now expanding, rather than decreasing. As a final blow, hurricane season has ended without a single storm hitting the U.S. (global warming was supposed to increase the number and severity of storms).

Even so, some worry that a large, human-induced increase in atmospheric CO2 could raise the earth's temperature. Gore exaggerates the effect that humans have on its levels. The real

“culprit” in CO2 production is not the United States, or even humanity as a whole, but nature. Humans contribute only 1-3 percent of carbon dioxide produced on earth. Interestingly, some theorize that the burning of fossil fuels, the CO2 producer that Gore most attacks, may to some extent mitigate its own effect by releasing other gases, which deflect heat, thus countering the greenhouse effect.

Ironically, a rise in temperature would not necessarily be bad. The past 3,000 years have included five periods hotter than the present and some think warmer temperatures would bring benefits such as increased agricultural output.

Finally, one has to wonder if Gore himself believes in global warming. Several times during the film he is shown flying in airplanes (he also uses a private jet), which burn enormous amounts of fossil fuel. Other advocates of measures to reduce carbon emissions also use private jets and SUVs, John Kerry and Arianna Huffington (“the jet was going there anyway”) among them.

The point, then, is not that the earth's temperature has not risen. It has — about 1 degree Fahrenheit over the past century. The point is that it is normal, natural and not harmful. Colorado State University hurricane expert Dr. William Gray predicts the earth will start cooling again within 10 years or so. This global warming scare, like the one in the '40s and the global cooling scare in the '70s, is likely to be a dud.

*Jonathan Ashbach is a 16-year old homeschooled young man, from Fortuna, California, who has written several op-ed articles from the conservative viewpoint for his local newspaper, The Eureka Reporter. His articles are always published and soon create a flurry of protests from the local liberals.*

*He then responds with a letter to the editor or a new article. He will be speaking at Eagle Forum's March 31 Education Conference and will be honored as our “Student of the Year.”*

## Have You Heard about the NAU?

by Bonnie Soong, Chapter Leader for San Mateo County Eagle Forum

“NAU” stands for *North American Union*. What on earth is that and why should we care?

Well, my friends, we have a big problem. Big. First, let me say that it has taken me five years of skepticism and research to understand the situation. I really encourage you to get informed and up-to-date. Here's an overview:

There has been a movement among the Executive branch (President, Cabinet, etc.) to meld our own US of A into a regional “North American Union” (NAU) with Canada and Mexico. In effect, this would dissolve our borders, nullify our Constitutional rights, and pollute our identity as citizens of the United States. We would have open borders and no national sovereignty. There would be no national defense. Instead, it would become a regional defense with our military troops guarding the continent rather than the nation. This is why illegal immigration has been allowed to continue for so long and worsen in time, and through several presidential administrations, not just the current one.

I'm assuming you are also skeptical, but let me point out a concrete example: the NAFTA Superhighway or Corridor which will soon be under construction in TX. It will begin in southern Mexico (Lazarro Cardenas) and allows cargo, especially from (communist) China, access through Mexico into the US with the

first customs stop in Kansas City, MO. It will be a road, rail, utility thoroughfare and will be **four** football fields wide.

And the customs office in Kansas City will be a Mexican port. That's right, it's reputed to be a *Mexican* port on American soil. There will be **no** American customs check on these huge cargo transports and they will have free access through the US and northward through Canada. And trust me, we do not want the Mexican government and its customs operations here.

For more info, check [eagleforum.org](http://eagleforum.org) (go to Quick Topics >> go to North American Union). There is a very helpful audio link to give a brief introduction to the NAU – middle section, “Chuck Baldwin Interview with Jerome Corsi.” Also try [AugustReview.com](http://AugustReview.com) for more history/details and [LouDobbs.com](http://LouDobbs.com) for updates.

Their plan intends to implement the NAU by 2010. The Executive branch does not have authority to do this without Congressional approval, per the Constitution. But they have used something called Fast Track temporary legislation to bypass proper

(NAU—Continued on page 7)

## A Resolution: Voter ID for Honest Elections

*Whereas*, California has the largest number of registered voters in the nation, yet lacks the checks and balances needed to assure ballot-box security and election integrity; and...

*Whereas*, Republicans have always believed in the principle that every *legal* ballot should count, that every *illegal* ballot should be rejected, and that nothing discourages or deters voters more than a belief that legal ballots have been negated by phantom voting or other illegal voting practices; and...

*Whereas*, eight of the nineteen 9/11 hijackers, all non-citizens, had registered to vote under “Motor Voter” when they were granted their driver’s licenses; and...

*Whereas*, an INS investigation into 1996’s 46<sup>th</sup> District California Congressional Election found that “4,023 illegal voters possibly cast ballots in the disputed election between Republican Robert Dornan and Democrat Loretta Sanchez”; and

*Whereas*, nearly 100 nations require voter ID to register to vote and to vote; and...

*Whereas*, Mexico has spent \$1 billion to assure *one citizen/one vote*, requiring voters to present a photo ID, sign a roster, and provide a thumbprint to secure a voter card — a tamper-resistant card which includes a holographic image, magnetic strip, and serial number — with thumbprint scanners then used to verify voting eligibility on election day; and...

*Whereas*, seven states require *photo* ID to register to vote and to vote, and 17 other states simply require ID; and these states have typically overcome ACLU charges of “poll tax” equivalence or “disenfranchisement”; and...

*Whereas*, in California a photo ID is required to cash a check, fly a plane, own a pet, or rent a movie; yet any poll worker or election official demanding ID from a potential voting registrant or potential voter violates current law; and...

*Whereas*, Rasmussen Research found in 2004 that 82% of Americans, including 75% of Kerry voters, believed “people should be required to show a driver’s license or some other form of photo ID before they are allowed to vote”; and...

*Whereas*, the *absentee* ballot, once reserved for the disabled, the ill, or the necessary traveler, is the method of voting that is least transparent *and most vulnerable to fraud* – and thanks to Motor Voter, one can register to vote, then vote absentee, and never have to prove citizenship or even existence as a human being; and...

*Whereas*, absentee ballot signature checks performed by county election officials are typically cursory, often lax; and...

*Whereas*, the present rush from electronic voting without a verified voter paper trail to permanent absentee voting and all mail-in voting will completely eliminate all transparency and any safeguards in the vote-count process, removing poll workers and in-person voting, the last bastion of ballot box integrity; and...

*Whereas*, given a statement attributed to Josef Stalin that “Those who cast the votes decide nothing. Those who count the votes decide everything”: the burden of proof for clean elections and reliable election results should rest on election officials, not on candidates and conscientious citizens; now therefore,

*Be It Resolved* that the California Republican Party encourages a voter ID requirement for voter registration and voting, whether by legislation or through the initiative process, as a basic protection long overdue in California elections to prevent voter fraud and as fundamental first step in restoring the confidence of voters in the reliability of elections; and

*Be It Further Resolved* that California Republican Party supports HR-4844, the Federal Election Integrity Act of 2006, passed September 20, 2006 by the U.S. House of Representatives, and now on hold in the Democrat-controlled Senate, requiring would-be voters in federal elections to provide a valid photo ID, with non-compliant voters permitted to vote provisionally and then to produce the required identification within 48 hours.

## Harmonization of the Borders

### Language Used as a Deceptive Tool

We're told aligning various border issues is a matter of convenience, nothing to be concerned about. Government officials explain cross border relationships as "harmonizing." Six years ago the NAFTA/GATT twelve lane 4 mile wide International Highway was quietly instituted. Starting at the Panama Canal, traversing international bridges from Mexico it continues up the middle of the U.S. into Canada. Intermodal Corridors fanning out across the nation connect to the Super-highway. This is the most expensive public works project in U.S. history. Taxpayers are financing importation of cheap foreign goods mostly from China and Mexico that compete with U.S. made products.

But let's just call this allowing the American consumer more choices.

This is (integrating) harmonizing global trade, the purpose behind NAFTA. Further harmony is being imposed by constructing two new Mexican ports. Long Beach and Los Angeles ports are so overwhelmed that some containers bound for the U.S. will be diverted to these Mexican container bases. Hutchinson Whampoa, the Chinese company that controls both ends of the Panama Canal will be the Mexican port manager. Escaping inspection and any delays the containers will travel directly to Kansas City where redevelopment has designated some land as Mexico's custom area.

### Integrating The Borders

This harmonization of U.S. and Mexico had its beginnings with the U.S. Border XX1 Program in 1996. Environment, Natural Resources, and Environmental Health agencies in both countries became integrated. Six pages in the Implementation Border Plans contain names of cross border

agencies. A binational effort Border XX1 manages the environment, health, and natural resources in each country. The Republican Assembly Caucus issued a report also in 1996, *America's Victims at its Southern Border*. It mentioned heavily armed drug gangs, the terrorizing of ranchers in broad daylight, border agents unable to deter the crossings, and the cost of illegal aliens and their children. A photo in the publication shows Mexican troops lined up in front of a U.S. Border Patrol van. They had trespassed on the land of an American rancher. Later when apprehended by the U.S. border Patrol no charges were filed. U.S. authorities didn't want to embarrass the Mexican government.

This set the precedent for further U.S./Mexico relationships.

American Border cities have been infiltrated by Mexican drug gangs. Recently there was even a \$6 million drug bust in Anaheim!

NAFTA calls for free passage from Mexico of people and goods. Mass immigration, trade, drugs and armed border incursions since 1993 have gradually become accepted. Now it is time to harmonize with Mexico on a different level.

### Financial Arrangements

The Federal Reserve System is helping illegal aliens, without Social Security numbers, wire money to Mexico's central bank at a reduced cost. Mexico's second largest source of income is from funds sent by their workers in the U.S. This is one of the Directo a Mexico programs.

Bank of America Corporation announced plans to give credit cards to immigrants without Social Security ID.

"Totalization" another definition of integration "harmonizing" is the term used to hand out Social Security bene-

fits to Mexicans who have worked in the U.S. at some time. This includes illegal aliens and even those who used stolen documents. U.S. and Mexican officials have held several high-level meetings. "Totalization" could take place any day according to the *Washington Post*. The State Department is planning an entirely new building in the embassy complex just to deal with the crush of Mexicans expected to apply for U.S. Social Security benefits there.

### Implementing NAFTA'S Transportation Agreement

The Teamster's union together with environmental and regulation concerns have kept Mexican trucks from traveling further than 25 miles from the U.S. border. Mexican goods would be transferred to American truckers at the 25 - mile limit. This has been changed. Within a few weeks 100 Mexican truck companies will have the full range of the U.S. Mexican drivers aren't tested for drugs, nor do they keep logs that limit the hours allowed on the road. American truckers are required to operate under these laws. Also the 100 Mexican companies will undoubtedly contract out to other firms. Trying to regulate such diverse trucking businesses will prove very difficult.

Kennedy, McCain, senators, and lobbyists are putting the final touches on a comprehensive immigration bill advocating amnesty along with a guest worker program. This would completely erase the border. We would be forced to harmonize our culture with one of the most corrupt countries in the world. Join with the influential anti-illegal immigration groups that are growing in numbers and influence. Let's take our country back from the politicians and the integration with Mexico.

Nancy Thomson

# NO AMNESTY!

They're coming back: the backers of amnesty for millions of illegals in the U.S. News reports were predicting that Sen. Ted Kennedy's new amnesty bill will be unveiled in the week of March 12, 2007. Good people opposed to giving away more and more of the U.S. can go to the website, [www.numbersusa.com](http://www.numbersusa.com), to stand up for America, and beat the establishment elite again this year, 2007!

While it is disheartening to see President Bush, the U.S. Chamber of Commerce and so many other amnesty advocates bringing the issue back again (after the battles of 2006), nevertheless, consider what THE PEOPLE did last year. In mid 2006, predictions were that the amnesty legislation would be rammed through. It didn't happen. The good people in the U.S. rose up and stopped it. Consider: Nearly every national elite force in America was pushing for an amnesty legalization of some 12 million illegal aliens in 2006.

## Only public sentiment stood in the way

Through the members of the [www.NumbersUSA.com](http://www.NumbersUSA.com) network, public sentiment was leveraged and -- combined with efforts by dozens of other groups -- it stopped what was supposed to have been a politically inevitable amnesty 2006.

- President Bush's amnesty failed in 2006.

- Sen. Kennedy's (D-MA) amnesty failed in 2006.
- Sen. McCain's (R-AZ) amnesty failed in 2006.
- The amnesty of the ACLU, the National Council of La Raza, the U.S. Catholic Bishops, the National Council of Churches and most mainline Protestant national offices, most national Jewish groups -- that amnesty failed.
- The U.S. Chamber of Commerce's amnesty failed, as did that of national restaurant, agricultural growers and hotel associations.
- The New York Times, Washington Post, Wall Street Journal and Los Angeles Times amnesties failed.

It can be done again. Tell a friend about the web site [www.NumbersUSA.com](http://www.NumbersUSA.com). Through the focus of the web site last year, tens of thousands of good conservative Americans brought thousands of faxes, phone calls, and other direct forms of action to bear. It was aimed at liberal legislators from all states to stop amnesty -- each time new legislation appeared.

It can be done again, but new people need to be recruited for the battle.

Check out [www.NumbersUSA.com](http://www.NumbersUSA.com).

[This communication was largely taken from Roy Beck's letter in December, 2006

The letter was edited, here, to make it current.]

## The Latest Lineup of Pro-Homosexual Bills in California Legislature - Join us for Lobby Day, March 20 to fight them.

The battle to defend the family and our children from the radical homosexual agenda and their twisted activists is well underway. Here are the latest bills with more promised. As you see, each year it gets a little bit worse than the last year. One of the worst is Senate Bill 777 by Shiela Kuehl. She and her fellow lesbian and gay legislators would like to silence any opposition to their lifestyles in the public schools so that homosexuals can have free reigns to indoctrinate and recruit more students to be part of that lifestyle.

- **Senate Bill 777:** would ban all instruction, school activities, instructional materials and even textbooks from "reflecting adversely" on homosexuality, bisexuality, transgenders and those who think they are the opposite sex.
- **Assembly Bill 14:** Amends 50 different parts of the law with special protections for homosexual, bisexuals and transgenders while at the same time punishing Christian churches, businesses and religious people for their beliefs.
- **Assembly Bill 43:** Redefines the definition of marriage to now include "any two persons," paving the way for two men or two women to marry.

- **Assembly Bill 675:** Would allocate \$250,000 to select schools to implement pro-homosexual "tolerance" programs.
- **Senate Bill 11:** Would grant all the rights of marriage to any two people who simply live together...no marriage required. Marriage would be equated to homosexual "domestic partnerships." A boyfriend and girlfriend, unmarried, would be granted marriage rights as well.
- **Assembly Bill 374: Physician Assisted Suicide:** would legalize death by a physician to a terminally ill patient. In a for-profit medical industry with uninsured Californians, this would be a deadly public policy. The lethal drugs cost about \$50. Legal assisted suicide would be the final "treatment" for poor, elderly, disabled or otherwise "unprofitable" patients.

Please join with us to speak out against these bills. Eagle Forum of California is co-sponsoring a Lobby Day with Capital Resource Institute, March 20, at the Capitol Building, Room 4020, 9:00 a.m. to 4:00 p.m. Call Karen England at 916-498-1940 for more information. We also ask you to write, fax, and call your state senators and assemblymen and ask them to reject these five bills.

(NAU—Continued from page 3)

procedure. We must NOT allow Fast Track to pass again in 2007.

You've probably never heard of this, and I hadn't either. The government has kept this activity very quiet, and only last year began to publicize it as a wonderful globalization effort, that the US has much to gain from joining economic/political/military resources with Canada and Mexico. *Are you joking? Do they think we're stupid?* Canada's economy is strongly socialist, and its military is negligible. Mexico? Corruption in all sectors of society, public and private. What do we have to gain in any of this? Nothing. The truth is, **we have everything to lose**.

They have constructed a website, SPP.gov. It is an incredibly deceptive spin marketing campaign. Its appearance is quite official-looking, complete with the US flag, etc. Take it for just what it is: an attempt to lull you into believing everything is fine, and you may now return to your busy lives.

Unfortunately, that is not the case. They have gone so far as to prepare an NAU denomination of currency, the *amero*. – just like the euro – to replace the dollar. Replace the dollar? How? Well, let's begin by saying the national debt is far worse than reported in the news. It's around 3.5 *trillion*, not x-billion. Recently the dollar has been rapidly dropping in value against other major currencies. If the dollar collapses, there must be a replacement. Voila -the amero. Please try to purchase goods made in the US.

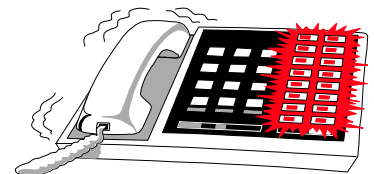

Lou Dobbs (CNN financial expert); Congressmen Tom Tancredo (CO)/Ron Paul (TX)/Virgil Goode (VA)/ Walter Jones (NC); Phyllis Schlafly (Eagle Forum); Jerome Corsi (author, Swift Boat Vets); Jim Gilchrist (Minutemen) are all making this public knowledge. Hopefully you have already heard of this and can help spread the word. The 2008 election is hugely critical. Please plan ahead, if you can at all, to spend some time to volunteer or financially support the pro-US (anti-globalist, anti-UN) candidates. Just remember, the UN, the globalists, the internationalists, are not your friends.

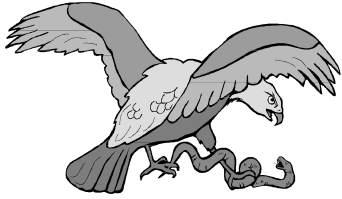

They are essentially a group of extremely wealthy and powerful persons well seated in business and government. It's helpful to recognize their manipulation techniques – the most common is "name-calling" with such labels as *nutcase, whacko, psycho, lunatic, kook, conspiracy theorist* that they assign to people who are reporting on their activity. This is very basic emotional manipulation to distract you from the real issue. Namecalling (*ad hominem*) attacks the person and ignores the content of the argument. It's one of the most common logical fallacies, especially in recent politics. Keep focused and don't let it distract you from pursuing the truth.

Let us continue to seek the Truth and recall the divine promise—that if we seek, we shall find
